

RODNEY ROY GITONGA

Nairobi, Kenya | Telephone: +254705762775 | Email: rodneyroygitonga@gmail.com | [LinkedIn](#)

Bringing a unique blend of technical expertise and practical application, I excel at turning complex data into actionable insights, particularly within the banking and finance sectors. Beyond my focus on data, my background in IT support and system administration gives me a comprehensive understanding of the technological ecosystems that underpin financial institutions. I am skilled in diagnosing and resolving complex issues, optimizing systems for performance and reliability, and ensuring a productive and secure technical environment. This holistic perspective allows me to bridge the gap between technical operations and business strategy.

TOP SKILLS & EXPERTISE

- **Analytics:** Power BI (Advanced Dashboarding & DAX), Data Analysis & Data Modeling, Financial Analysis & Forecasting, Data Storytelling & Visualization, ETL & Data Warehouse Concepts, Microsoft Excel (Advanced).
- **Databases:** SQL (Query Optimization, Views, Stored Procedures), MySQL, MongoDB, Database Administration (Basic), Data Integrity & Validation, Data Engineering Principles.
- **Programming:** Python (Pandas, NumPy, Scikit-learn), JavaScript / AngularJS, REST APIs & Integration, Process Automation (Power Apps, Python).
- **Cloud:** Oracle Cloud Infrastructure (OCI), Amazon Web Services (AWS), Git & Version Control, Docker & Containerization.
- **Systems:** Windows Server & Active Directory, Network Troubleshooting (TCP/IP, DNS), ITIL Principles & Service Desk, System Hardening & Security.
- **Soft Skills:** Clear Communication, Problem Resolution, Cross-functional Collaboration, Adaptability & Learning.

EDUCATION

2019 - 2024	BSc. Information Technology	Zetech University
2016 - 2018	Kenya Certificate of Secondary Education (KCSE)	Chania High School

CERTIFICATIONS

Ongoing	Data and AI	Cyber Shujaa
Jan 2026	Power BI Beginner to Pro Workshop	Pragmatic Works
Aug 2025	Associate Data Engineer	DataCamp
Sept 2025	Oracle Certified Associate	Oracle University
Jul 2025	SQL for Data Analysis	SimpliLearn
May 2025	The AWS Technical Essentials	SimpliLearn
May 2025	Power BI for Beginners	Cisco
Jul 2025	SQL Query Optimization for Beginners	SimpliLearn
Mar 2025	Python Essentials 1	Cisco
Mar 2025	Python Essentials 2	Cisco
Jul 2025	Python for Data Analysis	Cisco
Mar 2025	JavaScript Essentials 2	Cisco
May 2025	Introduction to ITIL® V4	SimpliLearn

Mar 2025	English for IT 2	Cisco
Mar 2025	Networking Devices and Initial Configuration	Cisco
Mar 2025	IT Customer Support Basics	Cisco
Mar 2025	Digital Safety and Security Awareness	Cisco
Oct 2025	Databricks Fundamentals	Databricks
Oct 2025	SQL Analytics and BI on Databricks	Databricks
Nov 2025	Model Context Protocol Anthropic	Anthropic
Nov 2025	AI Fluency Framework and Foundations	Anthropic
Jul 2025	Endpoint Management & Security	Manage Engine

EXPERIENCE

Gulf African Bank | Data Analytics Officer | Sept 2025 - Present

- Managed and optimized ETL (Extract, Transform, Load) processes to ensure the timely and accurate delivery of data for reporting and analysis.
- Designed and built Power Apps solutions to streamline operations and automate workflows across different bank departments.
- Performed comprehensive data analysis to identify trends, forecast performance, and support strategic planning.
- Translated raw banking data into actionable visualizations, supporting executive decisions on P&L and risk.
- Developed and maintained the foundational data layer (views) used for major Power BI dashboards across the bank.
- Partnered with business units to define requirements and deliver custom Power BI solutions for performance tracking.
- Led the end-to-end data visualization process, from requirement gathering to dashboard creation, ensuring reports were tailored to meet the strategic needs of various business units.

Gulf African Bank | Data Analytics Engineer Internship | Jul 2025 - Sept 2025

- Built Microsoft PowerApps solutions to streamline branch-level processes, improving efficiency and user experience across bank operations.
- Designed and developed interactive Power BI dashboards to visualize key financial and operational metrics, enabling data-driven decision-making.
- Gained hands-on experience in integrating Power BI dashboards with MySQL servers, ensuring seamless data connectivity and real-time reporting.

Gulf African Bank | IT Support Specialist Internship | Jan 2025 - Jul 2025

- Provided responsive end-user support and resolved technical issues to ensure smooth day-to-day operations across banking systems.
- Delivered on-site and remote technical support for hardware, software, and peripheral devices across multiple departments.
- Assisted in the maintenance, configuration, and monitoring of enterprise systems including core banking applications and business information systems.
- Contributed to network troubleshooting and supported RESTful services in the organization's internal applications.

- Supported the IT Service Desk by handling incident reports, logging issues, and escalating where necessary to improve resolution times.
- Participated in routine system updates, patching, and maintenance tasks, improving system performance and uptime.

Voi Winners Housing Cooperative Society Limited | Office Accountant & IT Assistant | May 2024 - Jan 2025

- Managed daily financial operations, including ledger reconciliation, billing, and budgeting processes.
- Oversaw real estate property management tasks, coordinating tenant interactions and lease documentation.
- Handled client liaison and customer service, addressing inquiries and providing administrative support to senior management.
- Led the IT infrastructure management for the cooperative, including network setup, administration, and hardware/software support.
- Designed and implemented digital communication strategies to improve engagement and streamline internal operations.
- Proactively troubleshooted and resolved IT issues, ensuring minimal downtime and enhancing system reliability for daily business functions.

Numeral IOT Limited | Junior Software Developer Internship | Mar 2022 - Sept 2022

- Developed web applications using AngularJS, ensuring responsive and user-friendly interfaces.
- Installed, configured, and maintained Windows Server environments to support business operations.
- Managed web hosting environments using cPanel, including domain and email configurations.
- Provided ongoing website maintenance and technical support to ensure optimal performance and uptime.
- Performed hardware diagnostics, repairs, and general computer maintenance.
- Supported system-level troubleshooting, configuration, and optimization for enhanced reliability and performance.

PROJECTS

Weekly Cash Holding Application | PowerApps Developer | June 2025 – Aug 2025

- Developed a mobile-optimized Microsoft PowerApps (Canvas App) solution to streamline the weekly reporting of cash holdings across various branch locations.
- Engineered a comprehensive data entry interface capable of granularly tracking Kenyan Shilling (KES) denominations, distinguishing between new and old generation notes and coins.
- Integrated the application with SharePoint Online to serve as a robust backend, automating data patching and timestamp generation for secure record-keeping.
- Implemented strict data validation logic to ensure integrity by preventing incomplete submissions and enforcing mandatory field population before database commitment.

- Designed a user-friendly experience with immediate success feedback loops and error messaging, significantly reducing data entry errors for staff members.

Weekly Counterfeit Holdings Tracker | PowerApps Developer | June 2025 – Aug 2025

- Constructed a specialized Microsoft PowerApps (Canvas App) solution to manage the sensitive reporting of weekly counterfeit currency holdings across the organization.
- Architected a dual-orientation mobile interface (Portrait and Landscape) to maximize usability and ensure staff could accurately input data from various mobile devices.
- Established a secure data connection with SharePoint Online, configuring a dedicated list to serve as the backend repository for reliable storage and retrieval of counterfeit records.
- Orchestrated the deployment process by packaging the solution for the corporate environment and managing connector permissions to ensure secure access control.
- Standardized the reporting workflow, replacing manual tracking methods with a digital solution that centralized counterfeit data for the Analytics department.

Staff Records Management Application | PowerApps Developer | June 2025 – Aug 2025

- Developed a mobile-first Microsoft PowerApps solution to digitize and centralize the management of organizational staff records.
- Configured SharePoint Online as the backend data source, establishing a secure connection to the "Staff Records" list for real-time data retrieval and storage.
- Engineered a responsive user interface that supports CRUD (Create, Read, Update, Delete) operations, allowing administrators to seamlessly browse, add, and edit personnel data.
- Optimized the application's layout for mobile form factors while ensuring cross-compatibility for tablet and desktop usage to maximize accessibility.
- Systematized the deployment process by creating importable package files (zip), enabling efficient migration and setup across different Power Platform environments.
